SUMMARY

Certified Business Data Analyst with hands-on experience across 10+ projects in Excel, SQL, Tableau, and Machine Learning. Skilled in data cleaning, visualization, predictive modelling and dashboard creation. Proven ability to extract actionable insights from complex datasets and deliver scalable, error-proof solutions. Completed mini, module, addon, and evaluation projects. Transforming raw data into strategic business decisions through creative storytelling and technical precision.

EDUCATION

UNIVERSITY INSTITUTE OF TECHNOLOGY,
THE UNIVERSITY OF BURDWAN

B.E in Information Technology

SKILL

- Python
- SQL
- Excel
- Tableau
- Machine Learning
- Data visualization tools experience:

WORK EXPERIENCE

Neelam Eco

Data Analyst (Deoghar, Jharkhand)

March 2020 - January 2025

September 2025 - PRESENT

- Formulated and implemented customer segmentation strategies using SQL & Excel, accelerating stock clearance rates and enhancing sales efficiency.
- Minimized product damage rates by 75% through in-depth data analysis, identifying and mitigating key factors.
- Engineered predictive models for market trends forecasting, contributing to notable 12% revenue growth by optimizing stock levels.
- Proficient in using data visualization tools such as Tableau and Google Data Studio.
- Applied **Machine Learning techniques** to strengthen EV operations and customer
 - **EV Demand Forecasting:** Built classification models to predict purchase likelihood across customer segments, helping optimize production and inventory planning.
 - **Delivery Delay Prediction:** Developed regression models to forecast shipment delays of EV parts and vehicles, enabling proactive supply chain management and improved customer satisfaction.

PROJECT EXPERIENCE

Cuvette Tech

June 2025 – September 2025

Data Analytics & Machine Learning Trainee

Evaluation Projects

- Concluded **8 hands-on evaluation projects** in **Excel, SQL, Tableau, and Machine Learning**, showcasing advanced skills in data handling, visualization, and predictive modeling. Projects are as

Excel :

1. Top 2000 Companies Financial Data (2024): Analyzed financial metrics, trends, and outliers using formulas and pivot tables.
2. Global Retail Sales: Performed regional sales analysis and led interactive dashboards for performance tracking.

SQL :

1. Olympics Dataset: Athlete performance, medal tallies, and country-wise participation.
2. Bike Store Sales: Extracted insights on customer behavior, product categories, and seasonal trends.

Tableau

1. World Population Analysis: Visualized demographic shifts, growth rates, and regional comparisons.
2. Superstore Dataset: Pioneered dashboards to track sales, profit margins, and shipping performance.

Machine Learning

1. Hotel Booking Dataset: Developed classification model to predict booking cancellations using logistic regression.
2. Delivery Delay Prediction: Built regression model to forecast delivery delays based on shipment and vendor data.

Module Projects

- Fulfilled **4 Hands-on Module Projects** across Excel, SQL, Tableau, and Machine Learning, applying structured learning to

solve real-world business problems with precision and insight.

CERTIFICATIONS (CUVETTE.TECH)

- Data Science Course Certificate.
- Tableau Module Completion Certificate.
- Machine Learning Module Completion Certificate.
- Excel Module Completion Certificate.
- SQL Module Completion Certificate.
